Forms

Composed UI patterns for collecting user input including field layout, validation, error handling, and multi-step flows.

Constituent Components

This pattern is composed of the following components:

Input

Label

Select

Checkbox

Radio Group

Button

Form

Toggle

Toggle Group

Guidelines

Do

- ✓ Place labels above input fields for consistent vertical scanning
- ✓ Group related fields visually with spacing or section headers
- ✓ Show inline validation errors below the relevant field
- ✓ Provide a clear step indicator for multi-step forms

Don't

- ✗ Do not use placeholder text as the only label

- ✗ Do not clear form fields after a validation error
- ✗ Do not submit without showing a summary/confirmation for critical operations

Responsive Behavior

Below 768px viewport width, this pattern reflows to a single-column layout. Interactive elements maintain their minimum touch target size of 44×44px. Horizontal scrolling is avoided — content wraps or truncates as appropriate.
